

Vircon BIM Training – Intermediate Level for BIM Practitioners

Introduction

BIM enables a virtual information shared-based model to be handled from the design team (architects, surveyors, engineers of various disciplines), main contractors, sub-contractors to the owners/operators of the building.

This 15-hours comprehensive course will lead the participants to learn from creation of a BIM Project, information required in a building envelope, to implementation of 3D architectural and structural modelling technique, up to Project completion. One of the highlights in this course is to illustrate the interrelationship of Temporary Works with Underground Utilities to give the learners a better understanding of the importance of co-relationship with different disciplines.

Learning Outcomes

Upon completion of this 15-hours training course, the participants will be able to manage the 3D modelling technique well, are confident to handle a small scale project with least supervisory and can work independently.

Course Name

BIM Practitioner (Civil) Training Course (Intermediate Level)

Course Code for CITF: PBT19-015

Course Outline

1. Create a Project and Configure project settings (1 hour)
2. Structural Modelling (3 hours)
 - Foundations
 - Columns, Walls and Openings
 - Beams and Brace systems
 - Reinforcements
3. Temporary Works Modeling (3 hours)
 - Create and Modify Temporary works (ELS, temporary working platform)
 - Create Simple Temporary Works for ELS
 - Create Simple Underground Utilities
4. Coordination and spatial checking (2 hours)
 - Project Phasing
 - Create Topography
 - Links with other Models
 - Clash Detection
5. Basics of Families (2 hours)
6. Drawing Production (2.5 hours)
 - Visibility and Graphic Controls
 - Annotations and Details
 - Tags and Schedule View
 - Sheets, Plotting and Publishing
7. Assignment and End Assessment (1.5 hours)

Target Audience

1. Civil Engineers working for Building / Civil Contracting Firms
2. BIM Modeler / Consultant working for Architectural, Structural, Quantity Survey and Building Services Consultancy firms, Building Project Management companies, and Developer of the Project.

Pre-requisite requirements

Basic knowledge* with hands-on experience in Revit is required;

Completion of Basic BIM training course is preferable

* Please refer to Vircon BIM Modelling Practical Course – Basic Level

Assessment:

Assignment and End Assessment

Award:

A certificate of completion will be awarded to the delegates with 80% of attendance and passing the end assessment.

Max. Class Size:

16 persons per class

Medium of Instruction

Chinese supplemented with English

Language of Training Materials

English

Duration for Training:

7.5 hours x 2 sessions (Full Time, FT) or

3 hours x 5 sessions (Part-time, PT)

Course Fee:

HKD3,000 per head
